

WINDJAMMER-STYLE WEATHERSTRIP

Product Highlights

Our Windjammer Foam Weatherstrip takes care of door drafts by sealing gaps with a weather seal. The product's sealing gasket retains its shape long term, providing energy savings. Tops are pre-cut for uniform fit and are easy to install for superior air sealing. Constructed out of easy to cut cellular Polyvinyl Chloride (PVC), the weatherstrip won't absorb water, rot, warp or splinter and remains pliable from -40°F. Each set contains one 36" header and two 84" factory coped side stops for uniform fit. It comes ready for nail up installation (nails not included) and is available in wide, narrow, white and brown.

Product Details

- Seals large and small gaps
- Remains pliable for -40°F
- Ready to install, paintable
